# Scroll View School for Video 9: Nesting Scroll Views

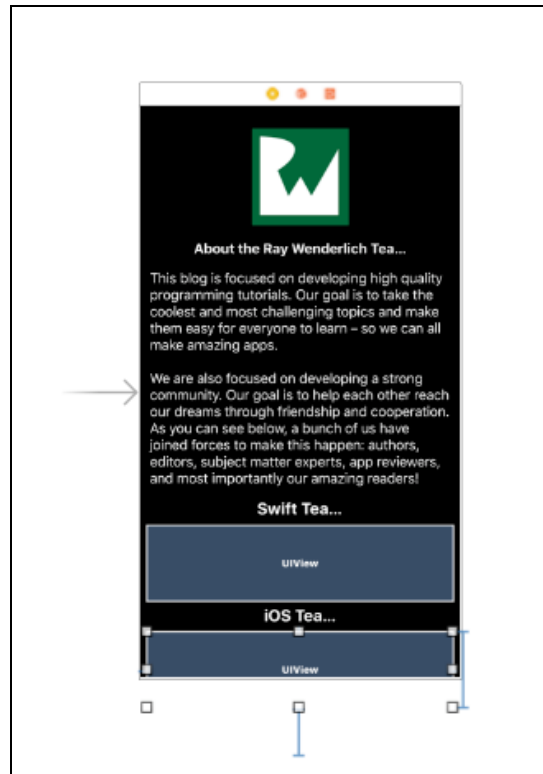

By Brian Moakley

There not may be a lot of occassions where you need to embedd scroll views inside of other scroll views. But, if you do need to know how to do it, then this challenge will be a big help.

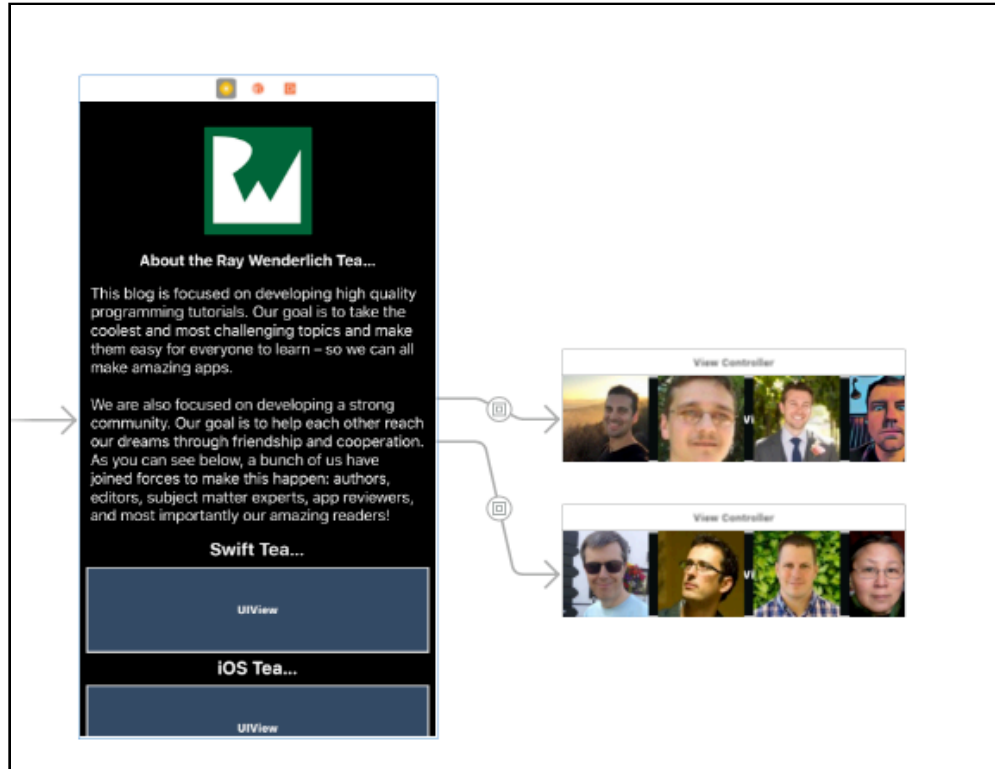

## Challenge

The challenge project contains a very simple layout that contains a list of teams for [raywenderlich.com](http://raywenderlich.com).

The view looks like the following:

When you are complete, the view controller will start looking like this:

Give it a shot!

## Need Help

To do this, you need to do a few things. You need to create a couple of new view controllers for the nested scroll views and then embed the scroll views inside of the new view controllers. Finally, you need to embed the view controllers by way of an embed segue.

Check out the completed project for the implementation.
